Digital Marketing

- SEO, SMO, content marketing, social engagement, keyword analysis and post project optimisation.

Every project we take on is important to us,
and every client is a big deal. We take care of
your projects, your deadlines, and your nerves
no matter what, and that's a promise.

Our simple and effective process

This is our tried and true process that ensures we're in alignment with the goals of each project. We don't just make things pretty, we make them work while remaining on target.

Discover

The first part of our process is about learning all about your industry.

Strategy

Next, we determine the best way to strategically meet the design goals of your brand.

Design

The design phase is where we build out the usage guidelines, user experience, and prototype the product.

Build

We're connected with some pretty talented and creative devs, they'll get the job done right.

Deliver

Finally, we package it all up and deliver the product to you. On time and on budget.

Our Work and Industries we already served

We strategically design beautiful mobile apps, websites, and digital branding that actually work. Creating a product that connects with your target group is essential for success, and we know how to do it.

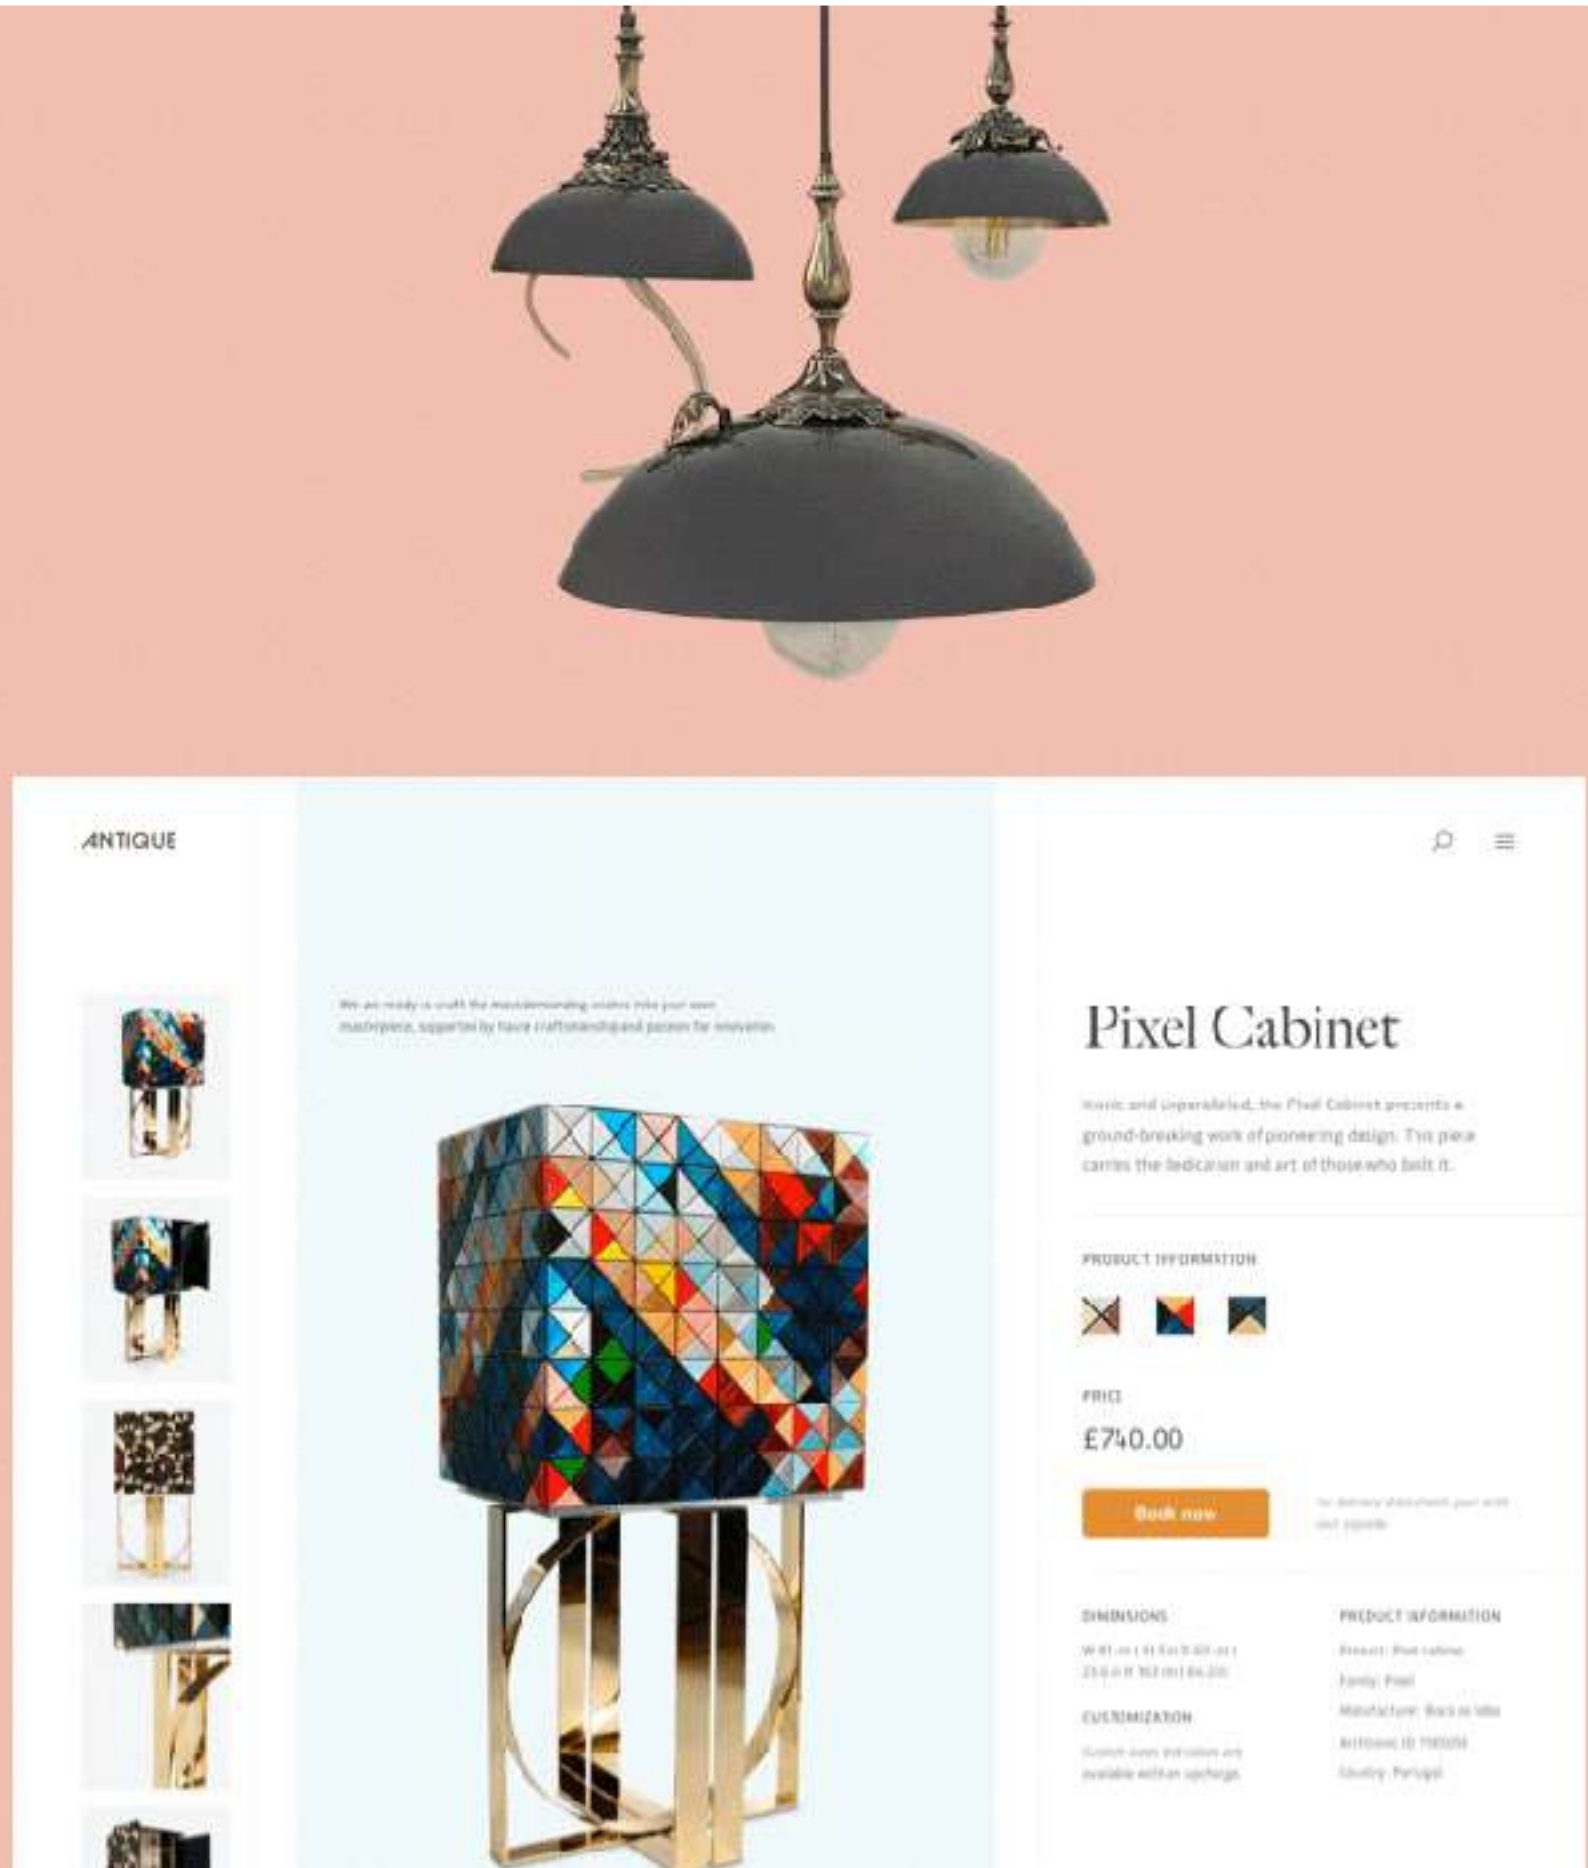

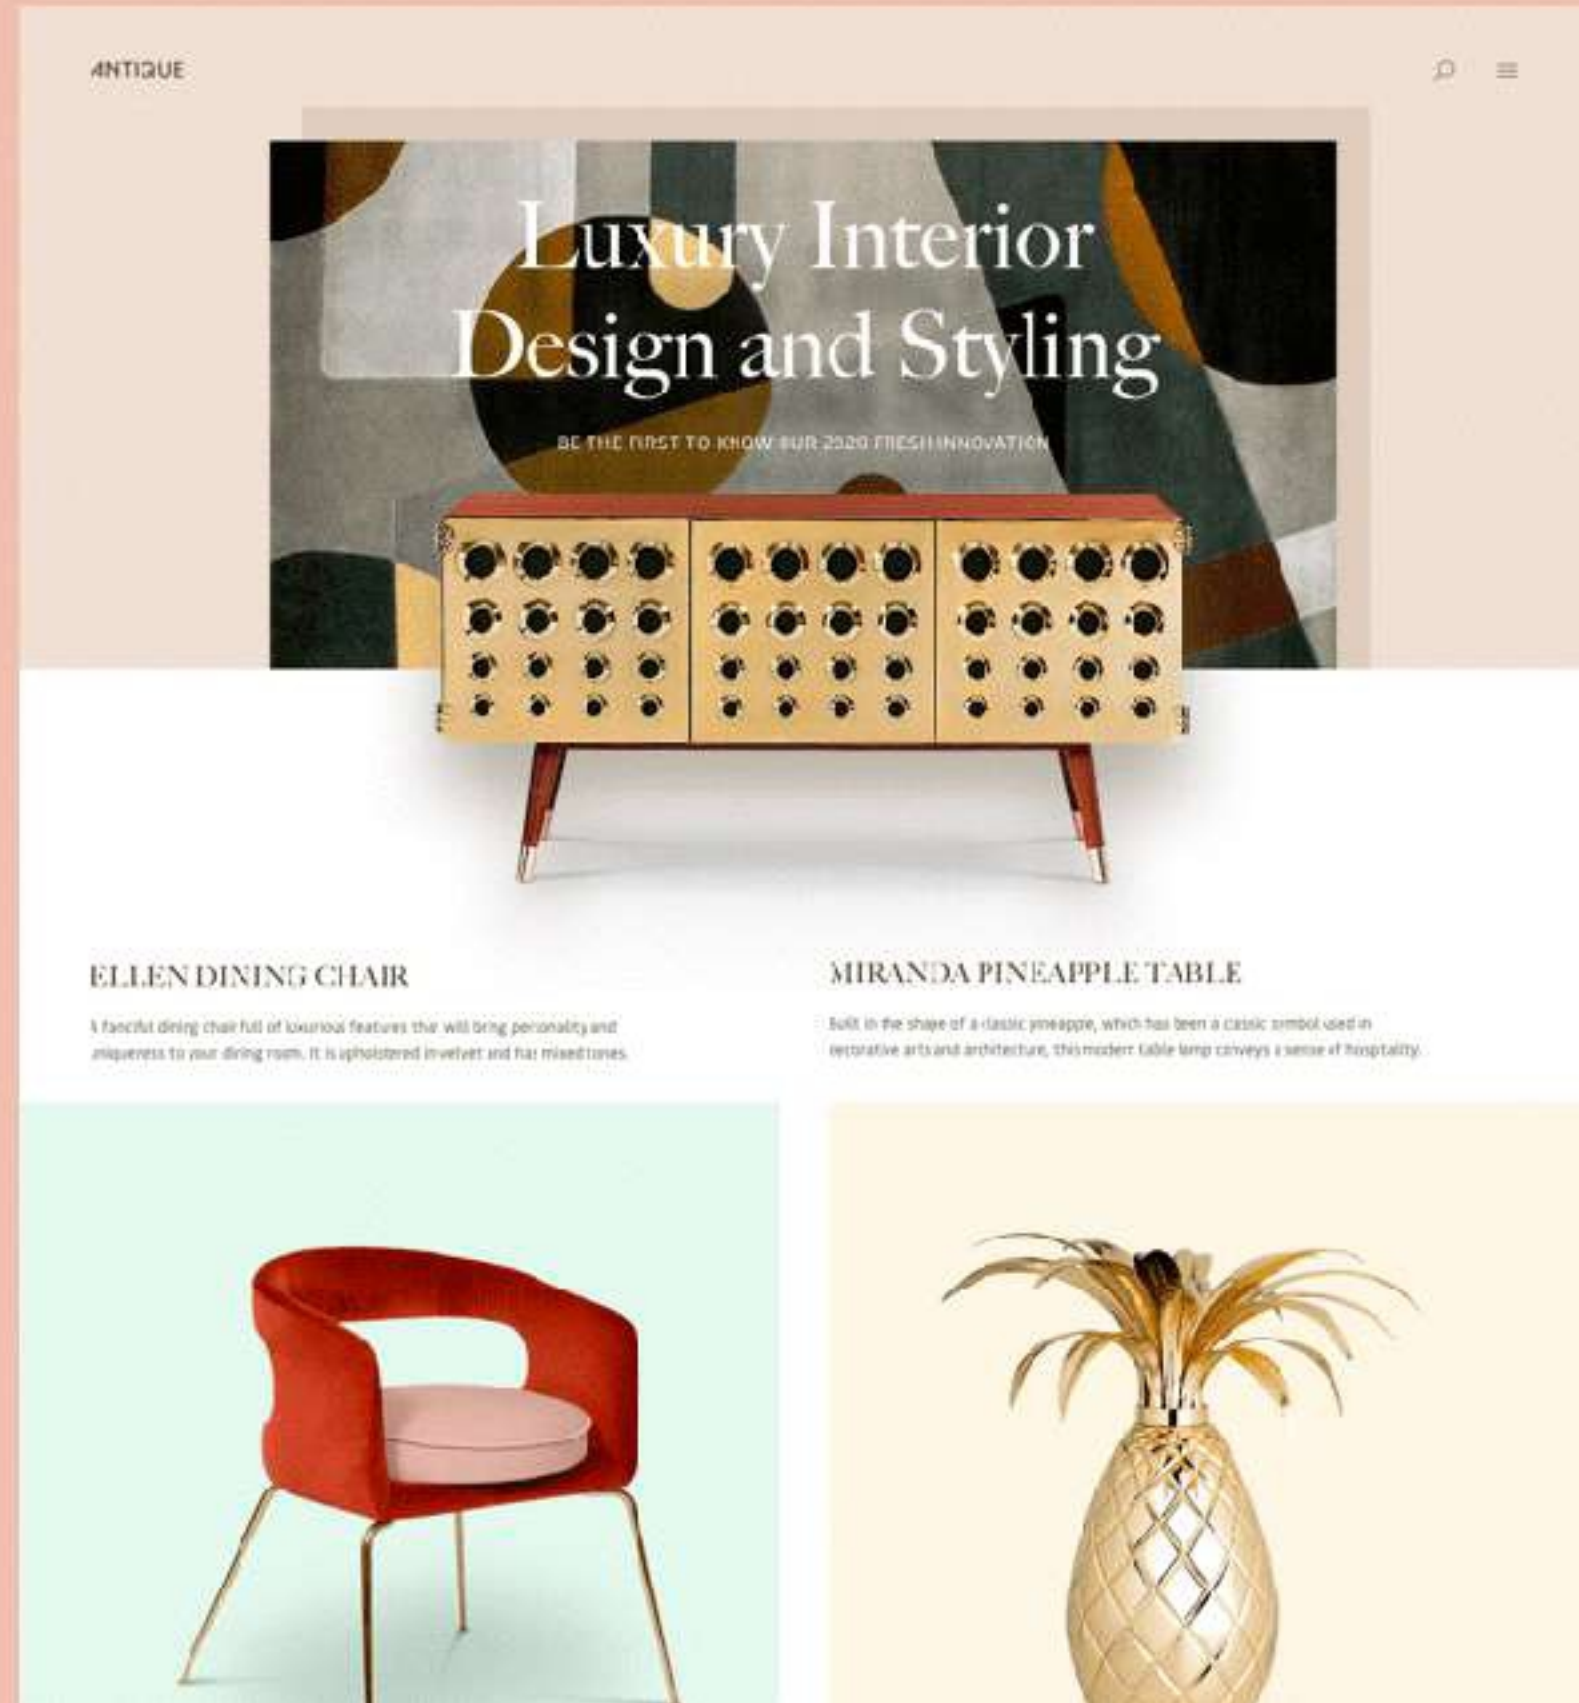

Accounting and Legal Sector

Delivering a custom mobile app experience to the clients of accounting and tax consulting business and making it quick and painless to scan and submit documents on a consistent basis for processing.

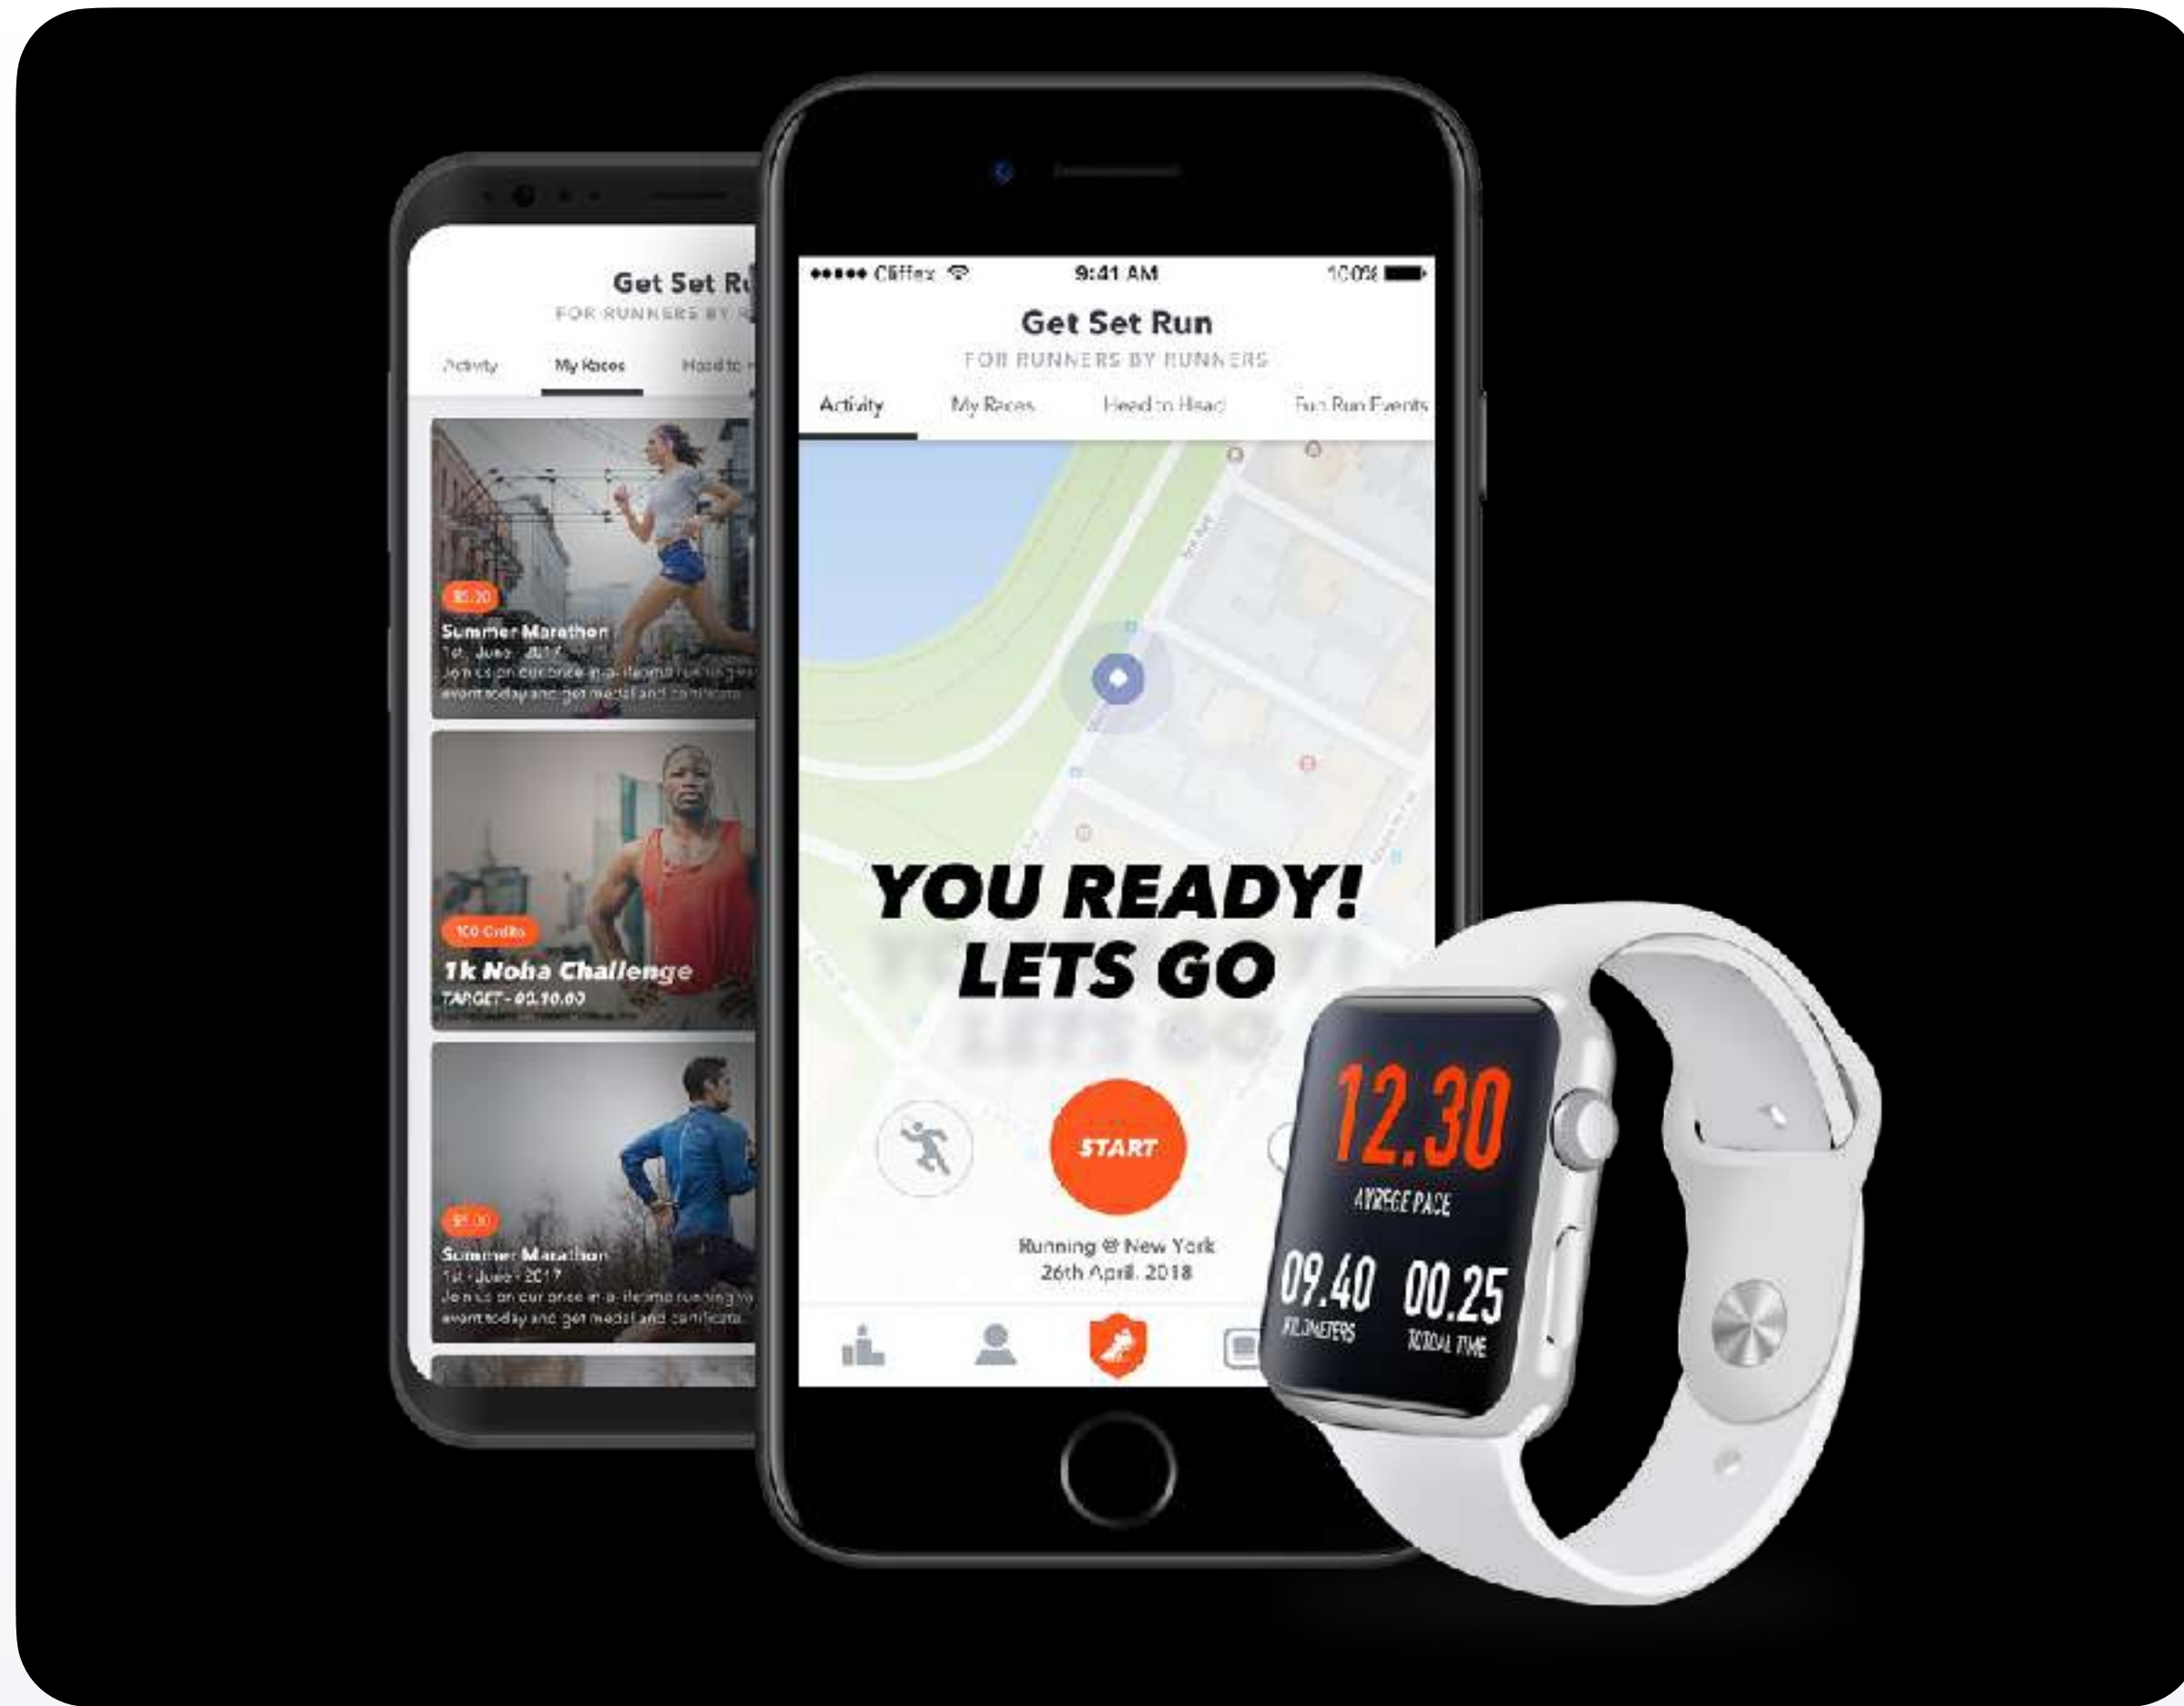

Online food ordering and Management System

Pallate is a simple way to ensure you get a premium dining experience every time. Patrons earn loyalty points on orders and table reservations. An experience that is uniquely Yours

We are driven by ideas with meaningful impact. Every website or mobile app we craft is a result of hours of brainstorming, hard work and dedication.

Testimonials

We believe that to build a product without a deep business and audience research is the same as shooting in the dark with the fingers crossed. Our expert team takes a systematic approach to develop digital experiences that step-by-step lead a business to success.

Clients Appreciation

Sam Sherman, CEO
BROKERGENIUS

I have nothing but great words to speak about them. They handle my app like their own. Things get done and problems get solved on their own.

Tom White, CEO
IQUANTIFI

Their services have always been professional and prompt while being flexible with the needs of a startup company... would highly recommend him to others.

Experienced Team

Projects at Deziplayer are helmed by industry veterans with proven experience in the field of product management, design and software development.

Jason Vowell, CTO
CONSENSUS POINT

The whole offshore team did a great job in our development process in first-rate and it's a wonderful experience.

Suresh Dakshina, President
CHARGEBACK GURUS

We just wanted to build an admin dashboard for chargeback gurus. What we got in return was the best feature of our product. Differentiated us from all our competition.

Cody L. Clark, President
SMART APPOINTMENT

We came to Cliffex with an idea of making doctor online appointment for their local patient, after an year, we have an system with thousands of monthly appointment generating and add so many features that help customers to reach right doctors and find best one near to them.

Kavan Antani
INDIEFOLIO

I build dedicated resource team for my product development and I can see better result than my in-house team. I am now only focused on my business growth that's the biggest support Cliffex provided me.

Expect nothing but the best product development experience with working with Cliffex.

Experienced Team

With their years of industry experience, our team members guide and advise you with best practices and innovative ideas that save time and mitigate potential pitfalls.

Agile Delivery

Our seasoned delivery managers get you to experience the magic of shorter work cycles, feedback based work and incremental improvements like a lean startup.

Best Tools

Our tools help us deliver great user interfaces and well engineered software. Expect us to use the latest, best, and advanced tools to build digital products.

Security

We take data security very seriously. Every project at Cliffex is reviewed by 3rd party cyber security experts for loopholes, data leakages and backdoor access.

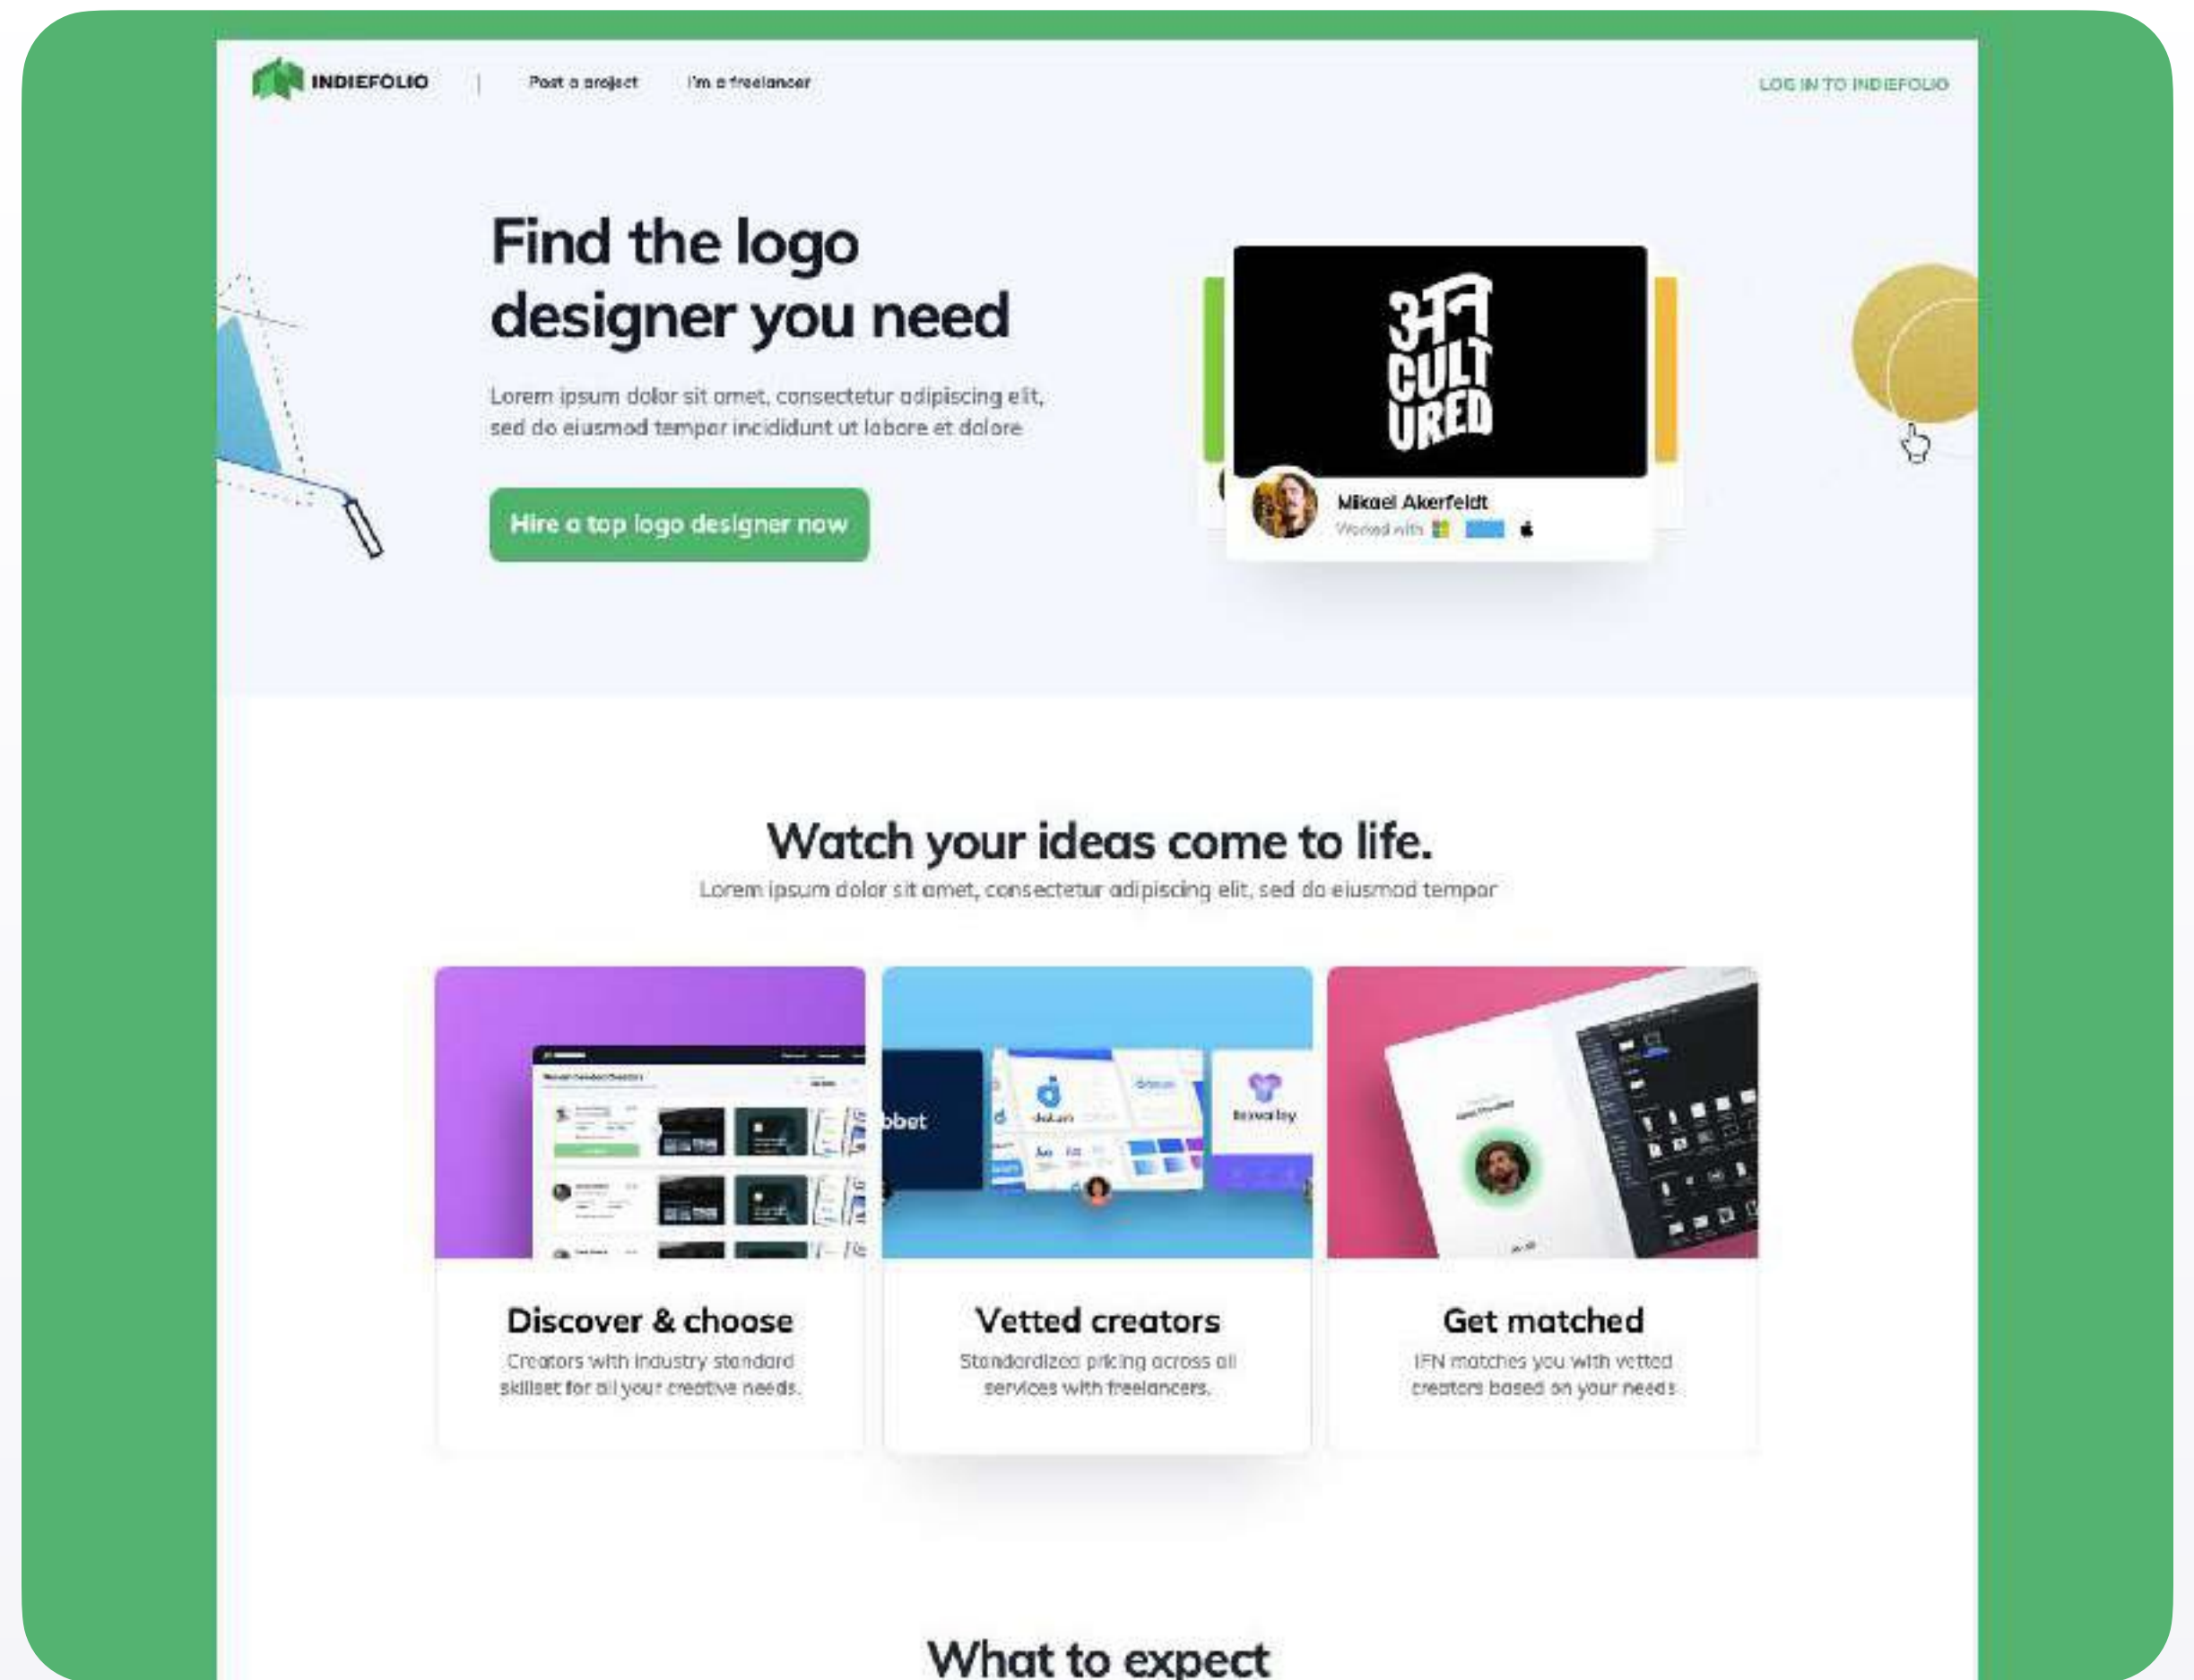

End-to-end Capability

We take pride in our strategy, design, and software development capabilities to craft digital products and take them from an idea to market within months of initiation.
